## 1 Executive summary

The MARILIA website is the key tool for promoting and disseminating the project's objectives, work plan, progresses, activities and results to a wide audience, enhancing its visibility amongst general public, European scientific community and stakeholders including prospective customers of the MARILIA solution or partners for its future market applications.

In order to attract audience, the website's contents will be maintained, continuously updated with new information about the project's lifetime (start date: September 1st 2020, duration 24 months).

The website shall display original content related to the key topics covered by the project (such as water safety monitoring, pathogen detection tests, DNA-based sensors and the industrial water re-usage) in order to attract experts and interested readers, engage a wide network and gain visibility for the project.
